Childhood Immunizations

Applies to: Family Practice and PEDs

Denominator: All patients who will turn 2 years of age in the current calendar year.

To meet the measure: All patient should have all 24 or 25 IZ's before turning 2 years of age: 4 DTP/DTaP, 3 IPV, 1 MMR, 3 Hib, 3 HepB, 1 VZV (Varicella), 4 Pneumococcal conjugate, 1 HepA, 2 or 3 Rotavirus (RV), and 2 influenza.

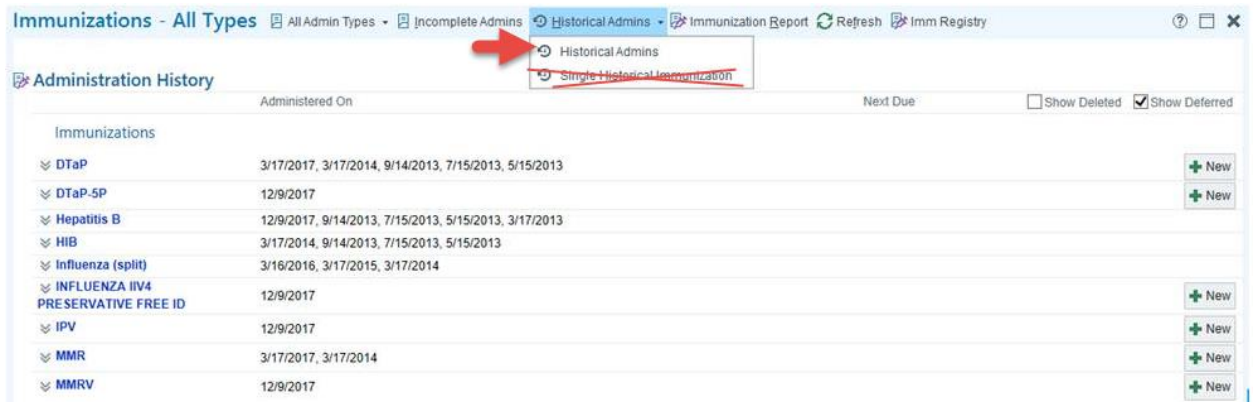

Notes:

• Patients under the catch-up schedule who do not need clinically all 24 or 25 IZ's will never meet the measure. To prevent the number of patients in this scenario, MA's should always schedule an applicable IZ follow up appointment based on CDC guidelines

MA/LVN workflow notes:

MA needs to add all historical IZ's (check CAIR, yellow IZ Card, etc.) Please note:

- In Chart Review or during the Visit: Go to the Immunizations Section
- Click on Historical Admins from the toolbar
- Enter dates next to the Immunizations that were given historically, then click Accept when completed
- Never use Single Historical Immunization to document a historical immunization

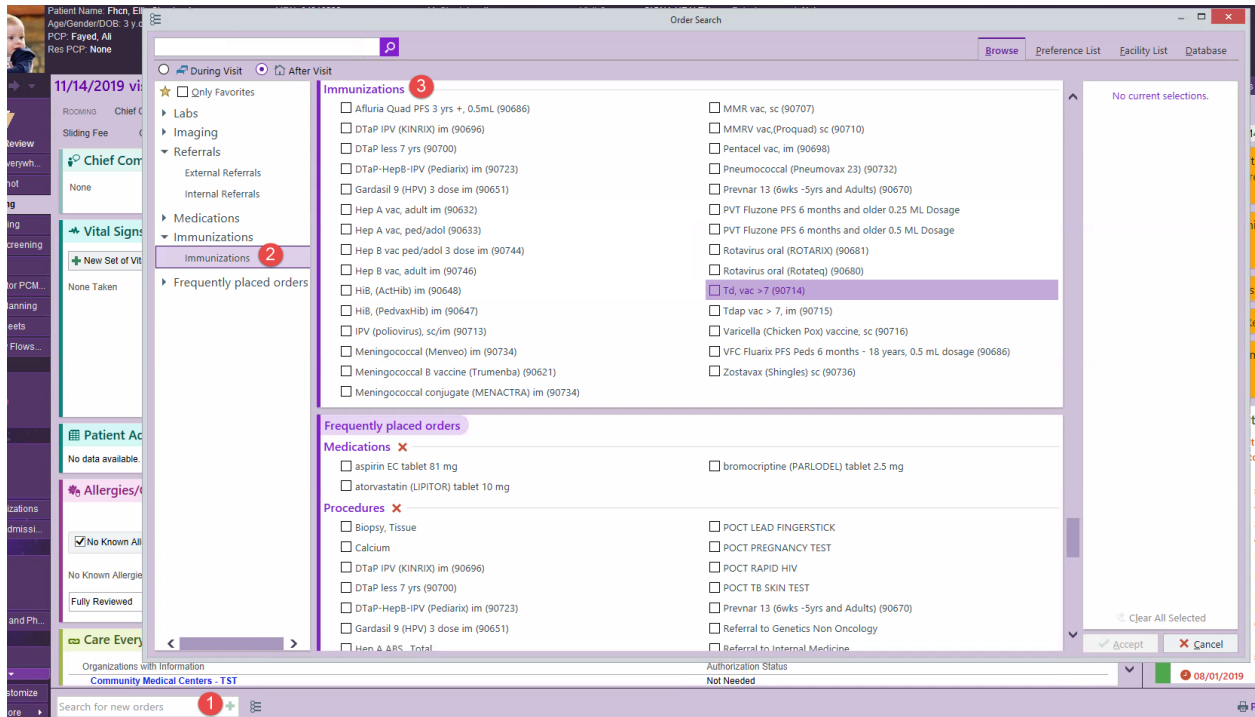

The screenshot shows the 'Immunizations - All Types' interface. The toolbar includes buttons for 'Historical Admins', 'Immunization Report', 'Refresh', and 'Imm Registry'. A red arrow points to the 'Historical Admins' button. Below the toolbar, the 'Administration History' section is visible, showing a table of immunizations with columns for 'Administered On' and 'Next Due'. The table lists various immunizations such as DTaP, Hepatitis B, Hib, Influenza (split), IPV, MMR, and MMRV, along with their respective dates and 'New' buttons.

Immunization	Administered On	Next Due	Show Deleted	Show Deferred
DTaP	3/17/2017, 3/17/2014, 9/14/2013, 7/15/2013, 5/15/2013		<input type="checkbox"/>	<input checked="" type="checkbox"/>
DTaP-5P	12/9/2017		<input type="checkbox"/>	<input checked="" type="checkbox"/>
Hepatitis B	12/9/2017, 9/14/2013, 7/15/2013, 5/15/2013, 3/17/2013		<input type="checkbox"/>	<input checked="" type="checkbox"/>
HIB	3/17/2014, 9/14/2013, 7/15/2013, 5/15/2013		<input type="checkbox"/>	<input checked="" type="checkbox"/>
Influenza (split)	3/16/2016, 3/17/2015, 3/17/2014		<input type="checkbox"/>	<input checked="" type="checkbox"/>
INFLUENZA IIV4 PRESERVATIVE FREE ID	12/9/2017		<input type="checkbox"/>	<input checked="" type="checkbox"/>
IPV	12/9/2017		<input type="checkbox"/>	<input checked="" type="checkbox"/>
MMR	3/17/2017, 3/17/2014		<input type="checkbox"/>	<input checked="" type="checkbox"/>
MMRV	12/9/2017		<input type="checkbox"/>	<input checked="" type="checkbox"/>

When MA/LVN/Provider have to administer new vaccines, please note:

- Check for the Health Maintenance Alerts as a reference to know what may be needed. Use the CAIR Routing Slip as a reference.
- Order Immunization, and once administered document required fields of administration, making sure to complete the VIS and VFC fields.

- The progress note needs to include documentation of who verified the immunization (MA/LVN will document this into their Note using the 'FHCN MA ITEMS PERFORMED smart text' provider can free-text.)

VIS FORM Given Date: 12/24/2018

Accept as Incomplete Accept Cancel

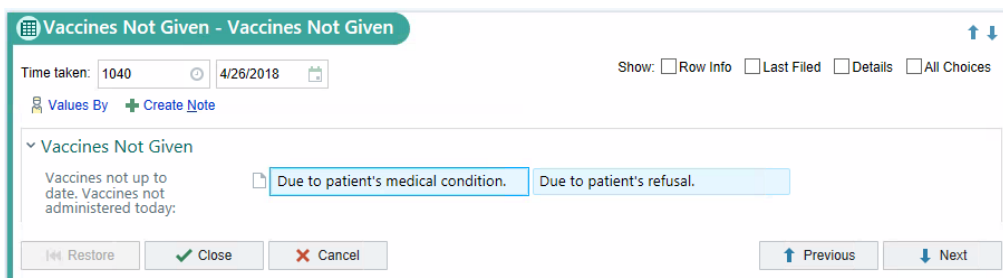

If IZ was not given, even though it was due:

- Provider/MA needs to cancel order if not yet signed, or, MA will Delete Immunization and enter deletion Reason and Comments as needed

- MA/Provider needs to go to the Screening Tab → to the Vaccines Not Given section to document the reason the vaccine was not given
- Select Close to save

Note: The documentation of a reason for not administering the vaccine/s will not exclude the patient from NOT meeting the numerator of the measure.

Exclusions:

- Allergy to applicable IZ's to be documented as structured allergies
- Patient under palliative care (aka Hospice); workflow is as follows:
 - Go to FYI flag (can be found in More button in lower left corner in the Encounter or in the Registration screen) → Choose New Flag: Palliative Care

Adult Weight Screening & Follow Up (18+)

Applies to: Family Practice, Internal Medicine, OBGYN, Behavioral Health, Nutrition, Dental, and other specialties

Denominator: All Patients 18+

To meet the measure: All patients 18+ with BMI recorded in Vitals, and the BMI is above 25 or below 18.5 kg/m² the patient needs to receive education on Nutrition & Physical Activity every 12 months. Education given needs to be documented via a structured field.

To document BMI:

- MA needs to record Height and weight at EVERY visit using the Vitals Screen and click on close once complete
- Note: the BMI does not show in red if it is out of range for adults

Patient Addtl Vitals [Refresh](#)

No data available

To provide applicable education material to the patient:

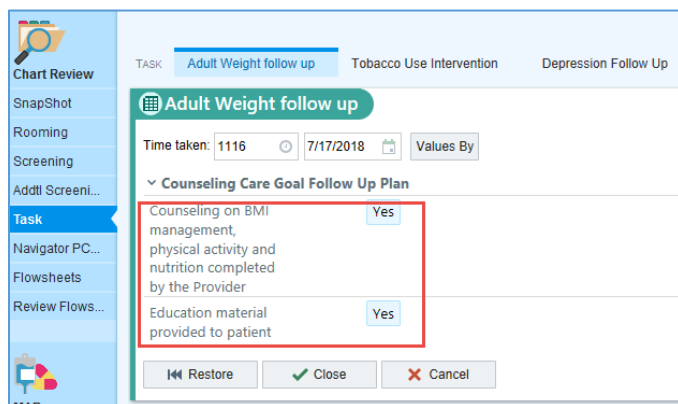

1. Preprinted material is given to patients as needed
2. Use the Letters activity and select the FHCN EDUCMATERIAL HEALTHY LIVING, print it out and save to the patient chart. Give the patient the printed copy.
3. Add Patient Education using Smart Text to Patient Instruction in Wrap Up to add education material to the After Visit Summary

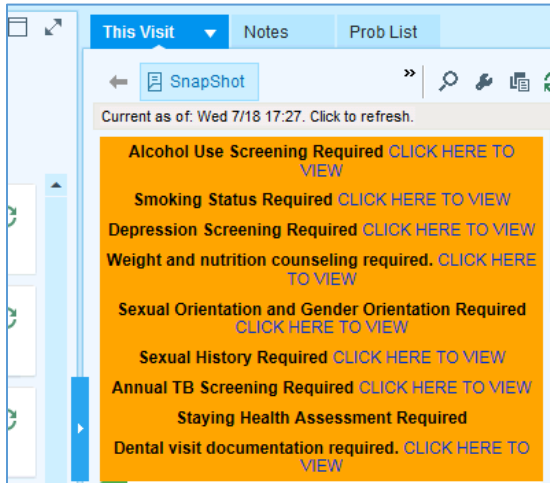

Provider Note: the provider will discuss/counsel with the patient as applicable

To document Education Material when given via structured field:

- MA or Provider- Go to the TASK Activities Bar, select Adult Weight Follow up
- Click on YES "Counseling on BMI management, physical activity and nutrition completed by Provider"
- As applicable, click on YES, on "Education material was provided to patient"

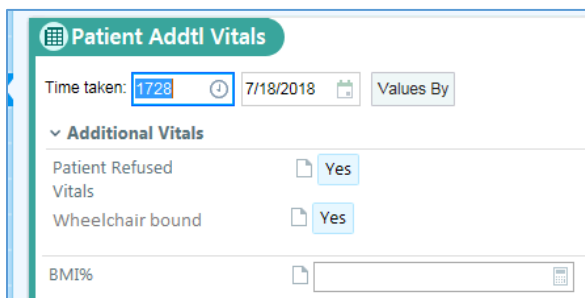

When completing this task, the **Health Reminder (in Orange)** in the Snapshot Screen will be removed. This reminder will display again every calendar year.

Exclusions:

- Pregnant patient
- Refused/Wheelchair bound documented in the Patient Addtl Vitals Screen
- Patient under palliative care (aka Hospice); workflow is as follows:
 - Go to FYI flag (can be found in More button in lower left corner in the Encounter or in the Registration screen) → Choose New Flag: Palliative Care
- Patients 65+ with mental illnesses, confusion, dementia, or nutritional deficiency whom weight reduction would complicate underlying medical conditions documented in Medical History or as a diagnosis in the problem list.

A screenshot of a 'Patient Addtl Vitals' form. The form has a title bar with a grid icon and the text 'Patient Addtl Vitals'. Below the title bar, there are fields for 'Time taken:' (with a clock icon and the value '1728'), '7/18/2018' (with a calendar icon), and 'Values By'. A section titled 'Additional Vitals' is expanded, showing three rows: 'Patient Refused Vitals' with a 'Yes' button, 'Wheelchair bound' with a 'Yes' button, and 'BMI%' with an empty input field and a document icon.

Weight Assessment/Counseling for Children: (2-17)

Applies to: Family Practice, PEDs, Dental, Behavioral Health, and Nutrition

Denominator: All patients 2-17 years old

To meet the measure: MA needs record height and weight in vitals for all patients 2-17 for EVERY visit. The percentile must be manually input in the Patient Addtl Vitals section. Education material must be provided. Education given needs to be documented via a structured field.

To document BMI Percentile:

- MA needs to record Height and weight at EVERY visit using the Vitals Screen and click on close
- To retrieve the BMI %, use the completed closed Vital Signs section
- Then, go to the Patient Addtl Vitals and enter the BMI Percentile. Click close to save

When completing this task, the **Health Reminder (in Orange)** in the Snapshot Screen will be removed. This reminder will display again every calendar year.

Exclusions:

- Pregnancy
- Patient under palliative care (aka Hospice); workflow is as follows:
 - Go to FYI flag (can be found in More button in lower left corner in the Encounter or in the Registration screen) → Choose New Flag: Palliative Care

Tobacco Use Assessment & Cessation Intervention

Applies to: Family Practice, Internal Medicine, OBGYN, Dental, Behavioral Health, Nutrition, and other specialties

Denominator: All patients 18+ years old

To meet measure: All patients 18+ of age need to have Tobacco Use screening completed. If the patient is a current smoker, patient needs to be counseled on the dangers of tobacco use and urged to quit. Documentation on tobacco counseling needs to be documented via a structured field.

To document Tobacco Screening:

- In the Rooming Activity, select History. Scroll down to the Social History section and complete the Tobacco related questions

The screenshot shows the EHR interface for a patient visit on 11/14/2019. The top navigation bar includes tabs for ROOMING, Chief Complaint, Vital Signs, Patient Addtl Vitals, Allergies, Care Everywhere, Verify Rx Benefits, Outside Meds, Home Medications, History (highlighted with a red box), Pain Review, and Goals. Below the navigation bar, there are sections for Sliding Fee and Consents. The main content area is titled 'Tobacco' (highlighted with a red box) and contains the following fields:

- Tobacco Use: [Text field with warning icon]
- Start Date: [Date picker]
- Quit Date: [Date picker]
- Types: Cigarettes | Pipe | Cigars
- Packs/day: 0.00 [Spinner] | 0.25 | 0.5 | 1 | 1.5 | 2 | 3
- Years: [Spinner] | 0.5 | 1 | 2 | 3 | 4 | 5 | 10
- Smokeless Tobacco Use: [Text field with warning icon]
- Types: Snuff | Chew
- Quit Date: [Date picker]
- Counselled on the dangers of tobacco and urged to quit. Educational material given. Yes | No
- Additional Tobacco Questions
- Second Hand Smoking: [Text field]

Notes:

- DO NOT document "Tobacco Use" in vitals section. NOTE: documenting from Vital Signs will not count towards the measure
- The Tobacco Section of the Social History needs to be completed every 12 months
- If the patient is a non-smoker, the **Orange Health Reminder** will be automatically removed
- If the patient is a smoker or former smoker, counseling on tobacco should be documented in the record.

How to provide applicable education material to the patient:

1. Preprinted material is given to patients as needed
2. Use the Letters activity and select the FHCN EDUCMATERIAL HEALTHY LIVING, print it out and save to the patient chart. Give the patient the printed copy.

3. Add Patient Education using Smart Text to Patient Instruction in Wrap Up to add education material to the After Visit Summary

Provider Note: the provider will discuss/counsel with the patient as applicable

MA/Provider- To document tobacco via structured field:

- Go to the TASK Activity, and select Tobacco Use Intervention
- Document YES on “Counseling on dangers of tobacco completed by the Provider”
- As applicable, click on YES , on “Education material was provided to patient”

Click on Close to save

The screenshot shows a software interface for documenting a 'Tobacco Use Intervention'. On the left is a navigation menu with options: 'Rooming', 'Screening', 'Addtl Screeni...', 'Task' (highlighted with a red circle), 'Navigator PC...', 'Flowsheets', and 'Review Flows...'. Below the menu is a 'MAR' section with a clipboard icon. The main window title is 'Tobacco Use Intervention'. It contains a 'Time taken' field with '0754', a date field with '7/19/2018', and a 'Values By' field. A 'Show: Row Info' option is on the right. Under a 'Preventive Medicine Smoking' section, there are two rows of data: 'Counseling on dangers of tobacco completed by the Provider' with 'Yes' and 'No' buttons, and 'Education material provided to patient' with a 'Yes' button. At the bottom are 'Restore', 'Close', and 'Cancel' buttons, and a 'Prev' button on the right.

Exclusions:

- None

Screening for Clinical Depression & Follow-up Plan:

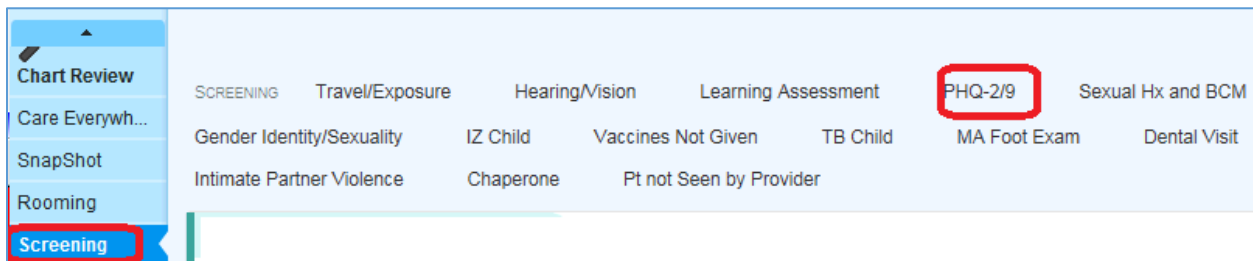

Applies to: Family Practice, Internal Medicine, PEDs, OBGYN, Dental, Behavioral Health, and Nutrition

Denominator: Patients 12 or older

To meet this measure: Conduct the PHQ-2/9 in the screening section annually. If patient tests PHQ2/9 total score of 1 or more, then follow up clinically as applicable (e.g. make an appt, provider counseling, etc.). Follow up on Depression when patient scores 1 or more; this needs to be documented via a structured field.

To document the Depression Score:

- Go to the Screening Activity and select the PHQ2/9 Form
- Document the answers to all questions. The form will automatically reflect the Total score
- Click on Close to save the form.

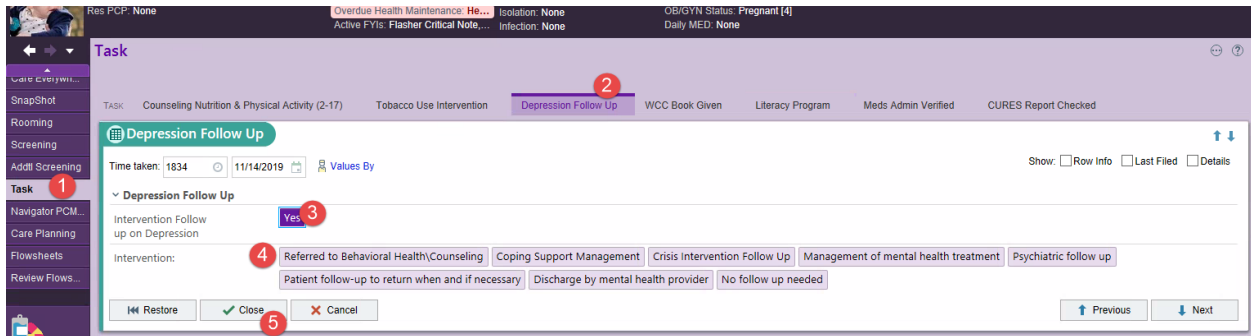

- If the Score is ZERO, the **Orange Health Reminder** will be automatically removed
- If the Score is 1 or more, the Depression Follow up must be completed.

Provider- To document Depression Follow up via structured field:

- If the Score is 1 or more, go to the TASK Activity, and select Depression Follow up
- Document YES on “Intervention Follow up on Depression” done
- Select applicable “Intervention” option
- Click on Close to save

The **Orange Health Reminder** will be automatically removed

Exclusions:

- Patients with a diagnosis of bipolar disorder or depression documented in the problem list
- Patients who refused the answer the PHQ2/9 Questionnaire (document within PHQ2/9)

✔ PHQ-2/9 - PHQ-9 - Patient Health Questionnaire

▼ Patient Refusal

Patient Refused Yes

▼ Over the last 2 weeks how often have you been bothered by any of the following

1. Little interest or pleasure in doing things	<input type="checkbox"/> 0-Not at all	<input type="checkbox"/> 1-Several days
2. Feeling down, depressed, or hopeless	<input type="checkbox"/> 0-Not at all	<input type="checkbox"/> 1-Several days
3. Trouble falling or staying asleep, or sleeping too much	<input type="checkbox"/> 0-Not at all	<input type="checkbox"/> 1-Several days

Cervical Cancer Screening

Applies to: Family Practice, Internal Medicine, and OBGYN

Denominator: All female patients 23-64

To meet the measure: Patients 23-29 need a Pap Smear resulted within the current Calendar Year or within the last 2 calendar years. Patients 30-64 need a pap smear with HPV co-testing resulted within the current calendar year or within the last 4 calendar years. Workflow to meet the measure is as follows:

Note:

- Provider needs to order applicable lab; MA team to follow up until the lab is resulted
- MA needs to schedule appointment for a Pap Smear if this is not done during the visit

Outside Documents: If patient had pap performed outside FHCN, the MA should ask the patient to bring the paper pap results to the clinic.

- The Paper pap results should be forwarded to the Health Record Department, who will perform the applicable steps to have the Lab Result count for the CQM
- Steps cannot be completed unless physical copy of cervical cancer screening report is scanned into record

Exclusions:

- Patients who have had a hysterectomy with no residual cervix – documented in the Surgical History tab
- Patient under palliative care (aka Hospice); workflow is as follows:
 - Go to FYI flag (can be found in More button in lower left corner in the Encounter or in the Registration screen) → Choose New Flag: Palliative Care

The screenshot shows a 'Surgical History' form with a grid of surgical procedures. Each procedure has three buttons: 'Yes', 'No', and 'None'. The 'Hysterectomy' row is highlighted with a red border. Below the grid, there are options for 'Other Surgical History', 'Loading Family History', and 'Loading Social History'. At the bottom, there are buttons for 'Mark as Reviewed', 'Never Reviewed', 'Restore', 'Close', 'Previous', and 'Next'.

Diabetes HbA1c (Poor Control)

Applies to: Family Practice and Internal Medicine

Denominator: Patients 18-75 years of age with diabetes diagnosis code(s) used in a claim, or displaying active in the problem list (e.g. E10-, E11-, E024-)

To meet the measure: Patients most recent HbA1c resulted in the calendar year with a value of <9% resulted in the calendar year.

The CQM (Clinical Quality Measure) will record in the numerator all patients with a HbA1C resulted in the measurement year with >9% or no test. Having a lower score is better.

Notes:

- If patients (age 18-75) have no HbA1c resulted in the calendar year or the HbA1c is 9% or higher in the most recent lab result, follow up & treat; schedule appointment, order the HbA1c when applicable, monitor until the HbA1c is back under control (<8% MA can order via approved CQM guidelines)

Exclusions:

- Gestational diabetes (O99.81) as active in the Problem List
- Steroid induced diabetes (E16.4, E16.8) as active in the Problem List
- Polycystic ovaries (E28.2) as active in the Problem List
- Patient under palliative care (aka Hospice); workflow is as follows:
 - Go to FYI flag (can be found in More button in lower left corner in the Encounter or in the Registration screen) → Choose New Flag: Palliative Care

The screenshot shows a clinical interface for a Hemoglobin A1C test. At the top, it says "Hemoglobin A1C" and "Status: Final result (Resulted: 4/20/2018)". Below this is a table titled "Component Results". The table has two columns: "Component" and "Resulted". The first row shows "Hemoglobin A1C" with a value of "9.2" in the "Component" column and "04/20/2018 00:00" in the "Resulted" column. The "9.2" is highlighted with a red box. Below the table is an "Encounter" section with a "View Encounter" link.

Component	Resulted
Hemoglobin A1C 9.2	04/20/2018 00:00

Hypertension

Applies to: Family Practice and Internal Medicine

Denominator: All patients 18-85 years of age with the hypertension diagnosis code(s) used in a claim or active in the problem list

To meet the measure: Patients need to have last BP <140 and <90 at the most recent visit/encounter within the calendar year

Notes:

- Blood Pressure is collected during every visit
- Providers will review the patients' blood pressure, if patients have BP <140 and <90 then patient will meet numerator
- MA/Provider will complete a New Blood Pressure intake as applicable during the visit
- If BP is still >140 or >90, Provider will treat as applicable. The MA needs to schedule a follow up appointment for BP check, this should be scheduled in the providers schedule within 2 weeks

BP	! 100/62
BP Location	Right arm
Patient Position	Sitting
Pulse	96
Resp	24
Temp	36.6 C (97.9 F)
Temp src	Infrared
Weight	17 kg (37 lb 6 oz)
Height	39.21" (99.6 cm)
Pain Score	0 - No pain

Exclusions:

- Pregnancy
- Diagnosis of end of stage renal disease, dialysis or renal transplant
- Patient under palliative care (aka Hospice); workflow is as follows:
 - Go to FYI flag (can be found in More button in lower left corner in the Encounter or in the Registration screen) → Choose New Flag: Palliative Care

Chlamydia

Applies to: Family Practice, Internal Medicine, PEDs, and OBGYN

Denominator: All female patients 10-25 years old of age, who are sexually active or unknown if sexually active

To meet the measure: Female patients with Chlamydia test resulted in the calendar year

Workflow:

- In the Screening ACTIVITY, the MA/NHC → Select the Sexual Hx and BCM Form → Document if the patient is Sexually Active for every patient over 10 years of age (screenshot below)
- MA/Provider/NHC need to order the chlamydia test and follow up until the lab test is resulted.

Notes:

- If the female patient has a visit in the CY and does not have sexual activity documented in the last 12 months, the patient will be included in the denominator

External Record flow:

- If patient had Chlamydia Screening outside FHCN, the MA should ask the patient bring the paper chlamydia results to the clinic. The paper Chlamydia results should be forwarded to the Health Record Department, who will perform the applicable steps to meet the measure.

The screenshot shows a software interface for a 'Screening' activity. At the top, there are several tabs: SCREENING, Travel/Exposure, Hearing/Vision, Learning Assessment, PHQ-2/9, Sexual Hx and BCM (highlighted with a red box), Gender Identity/Sexuality, and IZ Child. Below the tabs, there are sub-tabs: Intimate Partner Violence, Chaperone, and Pt not Seen by Provider. The main content area is titled 'Addtl Social History' and includes a 'Time taken' field with the value '10:11' and a date field with '7/19/2018'. Underneath, there is a section for 'Sexual Active' with a 'Yes' button selected. Below that, there is a section for 'Female Birth Control' with various options: Abstinence, Contraceptive Sponge, Cervical Cap/Diaphragm, Depo Provera 12 weeks Horn Injection, Female Condo, Hormonal/Contraceptive Patch, Hysterectomy, Intrauterine Device (IUD), Male Condom, Menopause, None - Infer, Oral Contraceptive, Other Method or Withdrawal, Rely on Male Vasectomy, and Rhythm Method (Fertility Awareness). At the bottom of the form, there are three buttons: 'Restore', 'Close', and 'Cancel'.

Asthma Medication Ratio

Applies to: Family Practice, Internal Medicine, and PEDs

Denominator: Patients 5-64 years of age with persistent asthma in a claim during the calendar year or displaying active in the problem list

To meet the measure: Patients need to have a ratio of controller medications to total asthma medications of 0.50 or greater

How to document medications:

- MA/Provider should document applicable medications currently taken by the patient into the Home Medications of the Rooming tab
- MA/Provider should review the Outside Medication Reconciliation section and add them to the record as applicable as taken
- Provider will prescribe or refill as applicable **while keeping in mind the required ratio**
- Providers need to always maintain problem list updated. E.g. resolving persistent asthma diagnosis if the patient if the condition has changed.

Note: Staff can use the Asthma Survey in the Addtl Screening Activity as a reference tool

Exclusions:

- Patients who are allergic to asthma medications. MA needs to document Rx Allergies using the Rx Button
- The following diagnosis codes: E84.0, E84.11, E84.19, E84.8, E84.9, J43.0, J43.1, J43.2, J43.8, J43.9, J44.0, J44.1, J44.9, J44.9, J44.9, J44.9, J68.4, J96.00, J96.01, J96.02, J96.20, J96.21, J96.22, J98.2, J98.3

Well Child Visits 3-6

Applies to: Family Practice and PEDs

Denominator: Children who turn 3-6 years of age in measurement year

To meet the measure: Patients must have a well child check in the calendar year:

- defined as a physical exam including a health and developmental history and health education/anticipatory guidance,
- and have applicable LOS: 99392, 99393, 99382, 99383
- and have Counseling on Nutrition and Physical Activity documented

Workflow Notes:

1. MA's have to document Vitals. BMI is a requirement for this measure
2. MA needs to document/update histories: medical history, surgical, family, social, etc. as applicable

Post-Partum Care

Applies to: OB/GYN

Denominator: Prenatal patients who delivered a live birth from October 8th of the previous measurement year to October 7th of the current measurement year

To meet the measure: Patients need a postpartum visit between 7 – 84 days after delivery that contains any the following:

1. Pelvic exam
2. OR Evaluation of BP, Weight and notation on Breast feeding (yes or no)
3. OR Notation of “PP care” , “PP check” (this means we could use visit types)
4. OR Perineal of cesarean wound check visit
5. OR Screening for depression, anxiety, tobacco use, mental health disorders, drug use
6. OR glucose screening for women with gestational diabetes
OR documentation of infant care, family planning, resumption of physical activity, etc.

Workflow for the patient to meet the Numerator

1. The patient needs to have a Post-Partum Visit 7-84 days after the delivery
2. The Post-Partum Visit will meet the requirement on any of the below scenarios
 - A) The provider needs to document any of these diagnosis that are common in a Postpartum-Encounter
 - Z01.411- gyn exam- normal
 - Z01.419 gyn with abnormal findings
 - Z01.42 pap smear
 - Z30.430- IUD
 - Z39.1 care for lactating mother
 - Z39.2 encounter for routine postpartum follow up.
 - B) AND/OR The provider will educate the patient, complete the PPD Scale in the Additional Screening Tab and will use the dot phrase .FHCN Postpartum, which will display the below information

Weight:	78 kg (172 lb)
Height:	56" (142.2 cm)

- B) AND/OR: The appointment visit type was :
- a. POST PARTUM 2 WEEK
 - b. POST PARTUM 6 WEEK
 - c. POSTPARTUM
- C) AND/OR: If the patient had gestational diabetes, the patient will also meet the numerator if the patient has a glucose screening test completed.
- D) AND/OR: If the patient has a Cervical Cancer Lab test ordered and resulted within 7-84 days of the delivery.

Breast Cancer Screening

Applies to: Family Practice, Internal Medicine, OB/GYN

Denominator: Women 52-74 years of age

To meet the measure: Patients who had a mammogram anytime on or between October 1st two years prior to the measurement year and December 31st of the measurement year (i.e.: For CY 2018 patient needs a mammogram between October 1st 2016 and December 31st 2018).

Workflow

The provider will review the Health Maintenance Alert window to identify If the Annual Mammogram is completed and shows as due in the future, or if it displays under Current Care Gaps as overdue.

- The provider will order the applicable mammogram following established workflows (generate referral Order)
- The Referral Staff/MA will follow up as applicable to ensure the mammogram is completed
- Most Mammogram orders are performed at CMC.
- Once the mammogram report is FINAL RESULT in Epic, it will be sent to the Ordering Provider's inBasket for review.
- Simultaneously , the Health Maintenance Alert for Mammogram will update as complete
- If the mammogram is performed at a non CMC Site, obtain the Mammo report, send it to the Health Records department at FHCN for them to upload it into Epic to fulfill the Health Maintenance alert and CQM Requirements

The screenshot displays the 'Health Maintenance' window in Epic. At the top, there is a patient information bar with fields like CSN, Allergies (Penicillins, Codeine, I...), and Overdue Health Maintenance. Below this is a toolbar with options like 'Address Topic', 'Remove Override', 'Document Past Immunization', 'Edit Modifiers', 'Report', 'Update HM', and 'Guidelines'. A prominent orange banner states 'New data from outside sources' with a 'Go Reconcile' button. The main content is a table with columns for Topic, Due Date, Frequency, and Date Completed. The table is divided into 'Current Care Gaps' and 'Upcoming' sections. In the 'Current Care Gaps' section, several items are listed as overdue, including HIV SCREEN, COLON CANCER SCREENING ANNUAL FOBT/FOBI, ZOSTER, RECOMBINANT (SHINGRIX) 50yrs+ (1 of 2), and INFLUENZA. In the 'Upcoming' section, 'AMB ANNUAL MAMMOGRAM' is listed with a next due date of 2/1/2020. A red arrow points to this row. Other upcoming items include 'AMB CERVICAL PAP 31-65', 'TD (ADULT)', and 'PNEUMOCOCCAL: 65+ YEARS (1 of 2 - PCV13)'. A red box highlights the text 'Overdue Health Maintenance. He...' in the patient's allergy/medication list above the table.

Topic	Due Date	Frequency	Date Completed
Current Care Gaps			
HIV SCREEN	Overdue since 10/11/1977	Once	
COLON CANCER SCREENING ANNUAL FOBT/FOBI	Overdue since 10/11/2012	1 year(s)	
ZOSTER, RECOMBINANT (SHINGRIX) 50yrs+ (1 of 2)	Overdue since 10/11/2012	Imm Details	
INFLUENZA	Overdue since 8/1/2019	1 year(s)	9/17/2018
Upcoming			
AMB ANNUAL MAMMOGRAM	Next due on 2/1/2020	1 year(s)	2/1/2019
AMB CERVICAL PAP 31-65	Next due on 11/29/2020	3 year(s)	11/29/2017
TD (ADULT)	Next due on 11/6/2024	10 year(s)	11/6/2014
PNEUMOCOCCAL: 65+ YEARS (1 of 2 - PCV13)	Next due on 10/11/2027	Imm Details	9/17/2018

Once Final result of these orders is in the chart, it will fulfil the **Breast Cancer Screening**:
